

Job Application Tracker MCP

Manage job applications through natural language — powered by MCP, no paid external APIs required.

Roa Makhtoob

Marwa Fageeh

Shaymaa Dar Taha

The Problem

Job seekers struggle to keep track of applications across dozens of companies, making it difficult to manage statuses, notes, and important details.

Track Companies &
Titles

Which role, which company?

Application Statuses

Applied, interview, rejected,
Accepted?

Notes & Details

Contacts, feedback, follow-
up info.

Find Info Fast |

Instant recall without
spreadsheet hunting.

How It Works

Natural Language → MCP Tools → Local Data

Claude Desktop

Interprets the request

MCP Server

TypeScript + Zod validation

Local JSON Storage

Saved on device, no cloud

Ask in plain English. Claude routes it to the right MCP tool, then saves the result locally.

MCP Tools

P0 · Core Tools

add_job_application

Quick add.

delete_job_application

Safe delete.

update_application_status

Fast status update.

P1 · Secondary Tools

add_job_application_note

Note attach.

list_job_applications

All apps.

get_job_application_details

Full details.

P2 · Advanced

remove_note

get_application_details

get_application_statistic

search_by_date_range

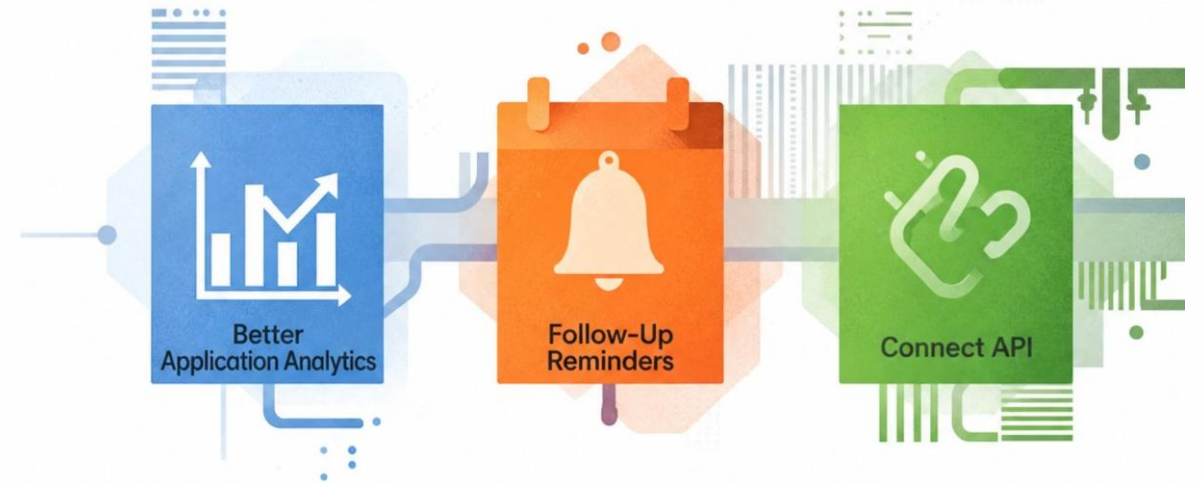

update_application_details
